

Power Strips

Homaco's versatile Horizontal Power Strips and Vertical Power Strips are the solution to your power and protection needs. Horizontal units mount standard 19" equipment racks or cabinets. Each unit is equipped with 8 outlets and a 15-foot SJT black cord.

Vertical units attach to the uprights of standard equipment racks and cabinets. Mounting brackets accommodate side or front installation. Spring clip attachment allows easy snap-in/snap-out unit access. Each unit includes 10 outlets and a 15-foot SJT black cord.

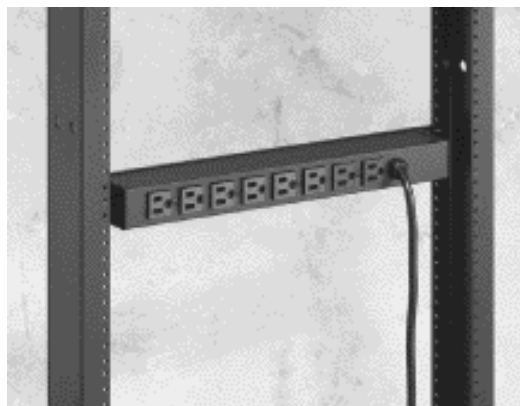

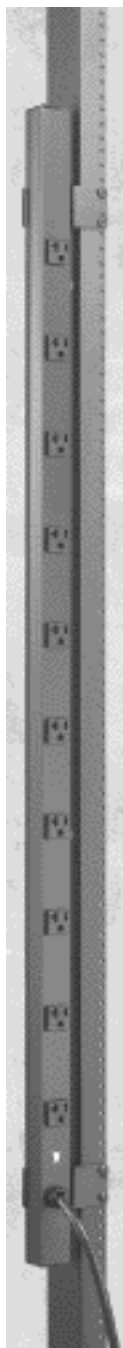

Optional Horizontal Power Strip and Vertical Power Strip features include surge protection and a NEMA-locking plug, ideal for safeguarding sensitive switching, computers, and other equipment, including LAN/WAN and CATV applications. For interior use only.

Horizontal Power Strips Feature:

- 15- or 20-amp receptacles and breakers
- Thoroughly tested and rated at 120 volts
- 8 power strip outlets
- Dimensions of 19.00" width, 1.75" height, and 2.75" depth
- Electronically and mechanically grounded
- Built-in, resettable overload circuit breaker
- Mount within one rack space
- Steel construction with black finish
- UL 1363 Relocatable Power Taps listed
- Units with surge protection: UL 1449 Transient Voltage Surge Suppressor listed

Vertical Power Strips Feature:

- 15- or 20-amp receptacles and breakers
- Thoroughly tested and rated at 120 volts
- 10 power strip outlets
- Dimensions of 48.00" length, 1.50" width, and 1.19" depth
- Electronically and mechanically grounded
- Built-in, resettable overload circuit breaker
- Aluminum construction with black finish
- UL 1363 Relocatable Power Taps listed
- Units with surge protection: UL 1449 Transient Voltage Surge Suppressor listed

As shown above: LEFT, Vertical Power Strip mounted to the side of the upright. This unit also mounts against the upright to allow for a closer fit when space is at a minimum; CENTER, Horizontal Power Strip, mounted from the rear of the rack; RIGHT, Horizontal Power Strip, mounted at the front of the rack.
